Institute of Australian Geographers Conference
9-13 July 2019 Wrest Point | Tasmania

Geographies of emergence, divergence and convergence

www.iagc2019.com
We would like to thank our generous supporters
Welcome
from the Local Organising Committee

We are delighted to welcome geographers and friends of geography to join us at the 2019 Conference of the Australian Institute of Geographers (IAG) in Hobart, Tasmania, 9-13 July.

The conference will be held on the banks of the Derwent River, at the Wrest Point Convention Centre, near the University of Tasmania’s Sandy Bay campus. For the mouheneener people, the river, estuary, coastline and surrounding landscapes - places of convergence - have strong cultural significance.

We get underway with a welcome reception and opening plenary on Tuesday 9 July 2019, starting around 5pm, with full conference days on Wednesday, Thursday and Friday.

The conference theme of ‘Geographies of Emergence, Divergence and Convergence’ embraces the diversity of our discipline while also creating a meaningful focus for integrating conversations across the conference. The conference theme speaks to intersections between physical and human geography, to scaled socio-spatial and socio-natural relationships, to global and local events and to historical geographies - past, present and future.

Through the conference website and at the conference itself, we hope to use this theme as an invitation to you, to get to know Tasmania as a place of cultural and ecological complexity and richness. We especially encourage you to explore the information that will be provided on the Conference website about Tasmania’s traditional owners and continuing custodians, the palawa and pakana peoples.

We look forward to the diverse sessions on emergent and traditional topics, to welcoming you to the conference, and to personally welcoming you to our island home.
